PROFESSIONAL SUMMARY

Information Technology undergraduate graduating in 2027 focused on Machine Learning, Generative AI, and AI/ML engineering. Built end-to-end ML and LLM systems spanning predictive modeling, explainable AI, agentic workflows, document intelligence, REST APIs, and computer vision.

PROJECTS

Universal Information Logging System 🔗

Python, FastAPI, React, TypeScript, PostgreSQL, SQLAlchemy, LangGraph, LLMs, Docker

- Built a domain-agnostic **agentic AI platform** converting text/documents across **5 input channels** into structured records using dynamic schema inference, entity extraction, confidence scoring, and human-in-the-loop validation.
- Engineered an **8-node LangGraph workflow with 5 tools** and integrated **5 LLM providers** with automated failover, rate-limit recovery, and two-tier routing across finance, healthcare, HR, support, and legal domains.
- Designed a PostgreSQL/JSONB architecture to scale from **100K+ to millions of records** and exposed **18 REST APIs**; built React/TypeScript UI and validated the full stack with **77 automated tests**.

Multi-Disease Risk Prediction System 🔗

Python, Flask, Next.js, PostgreSQL, Scikit-learn, XGBoost, Random Forest, SHAP, Gemini, Docker

- Engineered a multi-disease ML risk prediction platform across **27,193 records** using **stacked XGBoost + Random Forest + Logistic Regression** ensembles for Heart Disease, Diabetes, CKD, and health-marker risk.
- Implemented feature engineering, **RandomizedSearchCV + Stratified 5-Fold CV**, and held-out evaluation; achieved **99.93% ROC-AUC on held-out CKD data** and **99.81% mean CV ROC-AUC for heart disease**.
- Built a **60% clinical scoring + 40% ML** hybrid risk engine with SHAP explanations; integrated Gemini PDF biomarker extraction, Flask REST APIs, Clerk JWT, PostgreSQL, Docker, **67 backend tests**, and Playwright E2E testing.

Smart Attendance System 🔗

Python, OpenCV, MySQL, PHP, ESP32

- Developed a real-time **Haar Cascade + LBPH face-recognition** attendance system with Android IP Webcam, MySQL persistence, PHP dashboard, and ESP32 hardware feedback.

SKILLS

Languages: Python, SQL, JavaScript, TypeScript

AI/ML: Machine Learning, NumPy, Pandas, Scikit-learn, XGBoost, Random Forest, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Cross-Validation, SHAP, NLP, Generative AI, LLMs, LangGraph

Backend/Full-Stack: FastAPI, Flask, REST APIs, React, Next.js, SQLAlchemy, JWT Authentication, HTML/CSS

Databases/DevOps: PostgreSQL, MySQL, Git, GitHub, Docker, Docker Compose

Computer Vision: OpenCV, Haar Cascade, LBPH

EDUCATION

B.Tech. in Information Technology

Bhilai Institute of Technology, Durg | GPA: 7.43

2027

Durg, India
